HCA 1001

February 26, 2024 – May 24, 2024

Online, Asynchronous

For more information on this program, contact your school's guidance counsellor.

About This Course

Are you interested in a career where you can make a difference in people's quality of life? Enrolling in Health Care Aide Roles and Responsibilities will introduce you to the Health Care Aide profession. This course can be used towards the completion of a Health Care Aid Certificate with the required minimum grade of 70% in the course.

Course Description

During this course, you will focus on the role and responsibilities of a Health Care Aide working in a variety of employment settings. The focus of this course is to share information that will result in safe, ethical, and respectful care based on the needs of the client. Care that meets these standards is known as person-centred care. To meet the goal of person-centred care, the health care aide must be familiar with the provincial legislation that guides safe, ethical, and personalized care. In addition, knowledge of how to work as part of the health care team is essential, as is the ability to follow your employer's policy and procedures and your job description. The HCA is responsible for identifying, managing, and preventing potential environmental hazards in facilities and community-based settings and focusing on the client's safety as well as your own safety in different settings.

For more information on our Health Care Aid Certificate program, visit rdpolytech.ca/healthcareaide.
